

# Commercial Customer Exterior Lighting Program

**This program provides free energy efficient lighting measures to qualified customers!**

## About the Exterior Lighting Program:

The City of Shasta Lake has contracted with Efficiency Services Group (ESG) to perform a free evaluation of your exterior lighting to determine the energy savings opportunities for installing new efficient lighting products outside your building. This program also provides free energy efficient lighting measures to qualified customers in the commercial rate class. Qualifying equipment includes: LED shoebox fixtures, LED canopy fixtures, LED wall-mounted fixtures, LED retrofit lamps, and LED T8 lamps.

If you choose to move forward, the City of Shasta Lake will cover 100% of the equipment cost. You will be responsible for installing the fixtures. To schedule a lighting evaluation and participate in the program, or for questions about other rebate programs, please use the following resources:

(855)-516-2105

**By choosing to participate in the program, you agree to hold harmless the City of Shasta Lake and all representatives against any claim, demand, cause of action, loss, or liability whatsoever associated with any aspect of participation in this program.**

*Funding for this program is limited and customer participation is on a first come, first served basis.*
